SYMBOLS AND OTHER USAGES

The following symbols, where shown in columns of figures mean :

- n.a. not available
- n.y.a. not yet available
- nil or rounded to zero
- . . not applicable
- p preliminary—figure or series subject to revision
- r figure or series revised since previous issue
- n.e.i. not elsewhere included
- n.e.c. not elsewhere classified
 - * subject to sampling variability, too high for most practical purposes
- break in continuity of series (where drawn across a column between two consecutive figures)

Yearly periods shown as, e.g. 1981 refer to the year ended 31 December 1981, those shown as, e.g. 1981-82 refer to the year ended 30 June 1982. Other yearly periods are specifically indicated.

The metric system of weights and measures is generally used. Values are shown in Australian dollars (\$) or cents (c). Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

PREFACE

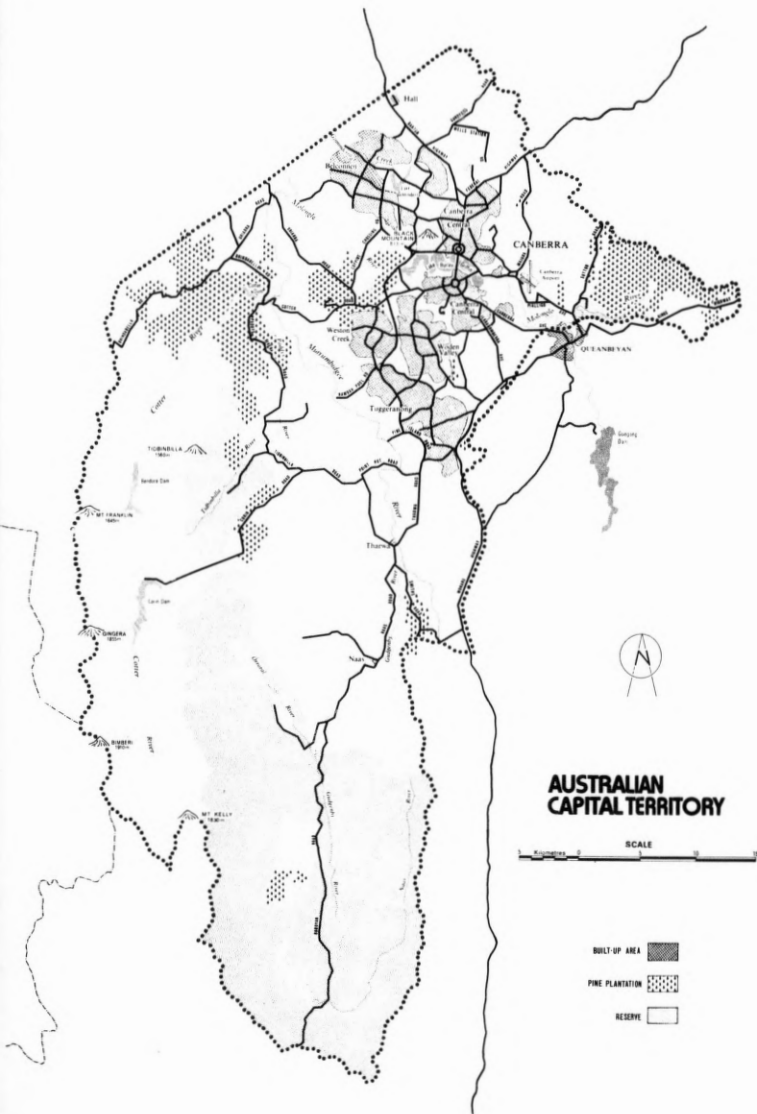

This is the nineteenth issue of this publication, which assembles in consolidated form the statistics of the Australian Capital Territory available in the ABS. The object of the Summary is to present as broad a range of statistics as possible.

The publication was redesigned for the 1979 edition with more emphasis being placed on statistics relating to such aspects as health, welfare and education.

(a) The rate represents the increase during the period expressed as a proportion (per cent) of the population at the beginning of the period. (b) Natural increase (excess of live births over deaths) expressed as a percentage of total increase. (c) Net migration (overseas and interstate) expressed as a percentage of total increase. (d) The sum of natural increase and net migration. (e) Census results. (f) Census counts, place of usual residence, adjusted for under-enumeration and including an estimate of A.C.T. residents temporarily overseas on census night. (g) Includes the effect of an intercensal adjustment. (h) Revised in the light of preliminary 1981 Census results, subject to minimal revision when final census results become available.

COMPONENTS OF POPULATION GROWTH, A.C.T.

Population increase

(a) Total increase is the sum of natural increase and net migration. However, from 1971 onwards the total increase figures include adjustments.

(a) Many divorces registered in the A.C.T. involve applicants normally resident in areas surrounding the A.C.T. In 1980, only about 56 per cent of A.C.T. divorces granted were to applicants normally resident in the A.C.T. The A.C.T. rate is therefore not a statistically accurate reflection of the extent of divorce among A.C.T. residents. (b) Introduction of Family Law Act.

NOTE. Crude rates have been revised in the light of revised calendar year mean populations on a usual residence basis.

(a) For children under one year of age the rates are deaths per 10,000 live births registered in a calendar year. The rates for all other age groups are deaths per 10,000 population of the same age and sex, estimated at 30 June each year. (b) Major causes of death registered in the A.C.T. in 1980 for males and females combined.

(c) Includes non-traffic accidents.

(a) In an Australia wide survey during February-May 1981, persons were able to report up to five medical conditions which related to their disabilities and therefore they may be included in more than one disabling condition category; however, they are only included once in the total and the sub-totals. (b) A disabled person is one who reported having one or more such disabilities or impairments as loss of sight or hearing, restricted use of limbs or having long term treatment or medication for a condition that continued to restrict the person in some way. The disabilities or impairments had to have lasted, or be likely to last, six months or more. (c) A handicapped person is a disabled person who was further identified as being limited to some degree in his/her ability to perform certain activities or tasks in one or more of the areas of self-care, mobility, communication, schooling or employment.

NOTE: More detailed definitions used in the survey are shown in the publication *Survey of handicapped persons, Australia, February-May 1981 (Preliminary)* (4342.0).

(a) Particulars of wages and salaries paid are not available for males and females separately; estimates have therefore been calculated in terms of male units, i.e. total male employees plus a proportion of female employees, the proportion being derived from the estimated ratio of female to male average earnings in each State. The ratio used in the current quarter for Australia is approximately 66.5 per cent. For further details on the separate State ratios see *Average Weekly Earnings, Australia* (6302.0). (b) Original series estimates have been calculated on a basis which excludes the effects of varying numbers of Australian Government pay-days in each quarter.

Original Series. Estimates of average weekly earnings are made each quarter in respect of both full-time and part-time civilian wage and salary earners in all industries combined. The earnings figures used in the calculation of the averages comprise award and over-award wages and salaries, the earnings of employees not covered by awards, overtime earnings, etc., and includes payments made retrospectively or in advance during the quarter. Particulars of employment and wages and salaries are derived from payroll tax returns and from direct returns from government and other bodies. For a more detailed explanation of the methods used, see *Average Weekly Earnings, Australia* (6302.0).

Seasonally adjusted series. Quarterly estimates are affected by seasonal influences. For example special payments, including prepayments for holiday periods tend to raise the December quarter and to depress the March averages. In addition, figures for all quarters are affected by the varying incidence of pay-days in successive quarters. Allowance for the varying incidence of paydays and for seasonal factors has been made in calculating the seasonally adjusted estimates. It should also be noted that seasonal adjustment factors were estimated from a series adjusted to allow for the effects of major awards and determinations of Federal and State industrial authorities. The effects of these awards and determination are retained in the seasonally adjusted data. A detailed description of the methods of seasonal adjustment is given in *Seasonally Adjusted Indicators, Australia* (1308.0).

AUSTRALIAN CAPITAL TERRITORY STATISTICAL SUMMARY
SURVEYS OF WEEKLY EARNINGS AND HOURS

Surveys conducted for a pay-period in October each year provide statistics of average weekly earnings (i.e. gross earnings before taxation and other deductions) and average weekly hours paid for. The surveys exclude members of the defence forces, employees in agriculture, employees of private households employing staff and employees of private employers (other than hospitals) not subject to payroll tax. For detailed statistics, explanatory notes and definitions concerning the survey, reference should be made to publications *Earnings and Hours of Employees (Preliminary), Australia* (6303.0) and *Earnings and Hours of Employees, Australia* (6304.0).

* From financial year 1980-81 a break in series has occurred as a new Building Activity Survey has replaced the previous Building Operations Census. Consequently figures from 1980-81 are not strictly comparable with those for earlier years and some caution should be exercised in comparing previous data. Further details of the changes in collection methodologies and their implications can be found in the September quarter 1980 issue of *Building Activities, Australian Capital Territory* (8706.0).

(a) Based on latest available population figures. (b) Average number of motor vehicles (excluding tractors, plant and equipment, caravans and trailers) on register. (c) In the past injured included any persons requiring surgical or medical treatment as a result of a road traffic accident. As the term medical treatment is open to a wide variety of interpretations, the definition of injured has been changed to include only those persons who were admitted to hospital. For this reason 1980 figures relating to casualty accidents and injured persons are not comparable with those of earlier years.

AUSTRALIAN CAPITAL TERRITORY STATISTICAL SUMMARY

In the following table, identifiable receipts and outlay relating to the Australian Capital Territory have been classified in a National Accounts form. The table covers transactions of the Commonwealth Government in respect of the Australian Capital Territory in the Consolidated Revenue Fund and the following trust funds: A.C.T.—Community Development Trust Fund, A.C.T. Forestry Trust Account, A.C.T. Housing Trust Account, A.C.T. Transport Trust Account, A.C.T. Suspense Trust Account. In addition, details of the financial transactions of the following public corporations are also covered: Electricity Authority, Commonwealth Brickworks (prior to its sale to the private sector in 1979), The Canberra Theatre Trust, the Canberra College of Advanced Education, A.C.T. Poker Machine Licensing Board, Canberra Commercial Development Authority, A.C.T. Totalisator Agency Board and the Capital Territory Health Commission including the Royal Canberra and Woden Valley Hospitals. All outlays by the National Capital Development Commission, including its expenditure on Commonwealth Offices and National works, are included in the table. Not included are revenue derived by the Commonwealth Government from income taxes, sales tax, etc. levied in the Australian Capital Territory; outlay (other than by N.C.D.C.) on items of a national character such as defence, civil aviation, railways, etc.; and payments to residents from the National Welfare Fund. Outlays and receipts of the Australian National University are not included in these tables.
